Subjects

Acetanilide, Serpentogenic properties of, 104
Acid decomposition of α-hydroxy-benzylsulphonic acid, 223
Acids and bases, 54
Activation of cheap organic molecules, 289
Activation, Entropy of, 269
Alfred Werner's coordination theory, 11
Amber, Origin of, 279
Ammonia, Liquid, Some properties of, 78
Ammonia manufacture and nitrogenous fertilizer production, The physical chemistry of, 30
Apparatus and equipment, New, 188, 284
Apparatus, Industrial, 107, 214
Apparatus, The Nuffield Chemistry, 41
Aufbau principle and the periodic table, The, 55

Bases, Acids and, 54
Birkeland-Eyde process, The, 106
Bonds, Chemical, 164, 321
Books and libraries, 217
Books, Recent (*see also* 'Essay Reviews'), 46, 96, 150, 210, 250, 304
Book reviews (letter), 320
British Society for the History of Science, The, 228

Chemical bonds, 164, 321
Chemical documentation, Teaching, 236
Chemical education goes international, 293
Chemical education, Summer Schools in, 134, 227
Chemical education, Why? 218
Chemical industry, U.K., How it may look in 1986, 190
Chemical kinetic problems, Solution of, and simulation of kinetics of chemical interactions by analogue computer, 280
Chemicals at I.C.I. Mond Division, Making, 117
Chemistry, How not to teach, 58
Chemistry, Is it a technology? 111
Chemistry, Project work in, 68
Chemistry, School, New examinations in, 112
Chemistry Student, 226
Chemistry, Teaching, by machine, 141
Chemistry, Using models in, 135
Chemists, Libraries for, 239

Subjects—*continued*

Chloropentammine cobalt(III) chloride, 161
Conference for lecturers in HNC chemistry, 208
Conferences, Courses and, 93, 147, 207, 265, 313
Construction of laboratory curricula, 157
Consumer Chemistry, 76
Coordination theory, Alfred Werner's, 11
Courses and Conferences, 93, 147, 207, 265, 313
Curie, Marie, 1867–1934, 271
Curricula, Laboratory, Construction of, 157

Defects in the solid state, 160
Dimensions of physical quantities, The, 81, 320
Documentation, Teaching chemical, 236

Editorial Board gains new member, 196
Educación Química, 18
Education and training of chemists for the 1970's, 87
Education, Chemical, goes international, 293
Education is change, 57
Education?, Why chemical, 218
Electrochemistry, Organic, part 1, 299
Electronic approach to organic chemistry, 54
Electrophilic and nucleophilic character of Group 3 hydrides in organic reductions, 183
Endothermic or thermoneutral reactions, Spontaneous, 107
Entropy of activation, 269
Equation of state of an imperfect gas, 21
Equipment and apparatus, New, 188, 284
Equipment, Science, for schools—a Scottish approach, 286
Essay Reviews, 245
Examinations in school chemistry, New, 112
Examinations, Multiple-choice questions in, 160
Examinations, The Nuffield 'O'-level Chemistry, 2

Fermentation, Yeast, Zero order, 197
Fertilizer production, Nitrogenous, The physical chemistry of ammonia manufacture and, 30
Film index, 268
Film loops, 315
Film loops, Nuffield, 19
Films (Reviews), 267, 315
Films for teachers (*see also* 'Film index'), 45, 95, 207
Filmstrips for teachers, 149
Fluorescent spectrography, X-ray, 295

Gas, Equation of state of an imperfect, 21
Group 3 hydrides, Electrophilic and nucleophilic character of in organic reductions, 183

Half-life experiment, A convenient radioactive, 178
History of Science, The British Society for the, 228
History, Teaching, 105
HNC chemistry, Conference for lecturers in, 208
How not to teach chemistry, 58
How the U.K. chemical industry may look in 1986, 190
Hydrides, Group 3, Nucleophilic and electrophilic character of in organic reductions, 183
α-Hydroxy-benzylsulphonic acid, Acid decomposition of, 223

I.C.I. Mond Division, Making chemicals at, 117
Imperfect gas, Equation of state of an, 21
In defence of Nuffield, 64
Industrial apparatus, 107, 214
Industry, U.K. chemical, How it may look in 1986, 190
Information retrieval for teachers, 233, 276
Instant spots (for qualitative analysis), 156
Ion exchange, 104
Is chemistry a technology? 111

Journals, Technical, Learning from, 241

Kinetics of chemical interactions, Simulation of, and solution of chemical kinetic problems by analogue computer, 280

Laboratory curricula, Construction of, 157
Laboratory ware on show, 143
Large-scale production (of vinyl chloride), 270
Learning from technical journals, 241
Libraries for chemists, 239
Libraries . . ., Of books and, 217
Liquid ammonia, Some properties of, 78

Making chemicals at I.C.I. Mond Division, 117, 270
Marie Curie, 1867–1934, 271
Model, Molecular, to demonstrate Walden inversion, 139
Models in chemistry, Using, 135
Modern trends in chemistry—A refresher course for school teachers, 91
Molarity and normality, 104, 216, 318
Molecularity, Order and, 158, 321
Molecular model to demonstrate Walden inversion, 139
Molecules, cheap organic, Activation of, 289
Multiple-choice questions at university, 272
Multiple-choice questions in examinations, 160

Name reactions, Organic, part 2, 200
Navex '67, 230
New apparatus and equipment, 188, 284
New examinations in school chemistry, 112
New University, 283
Nitrogenous fertilizer production, The physical chemistry of ammonia manufacture and, 30
Normality, Molarity and, 104, 216, 318
Nomenclature, Symbolism and, 318
'Normality', The origin of, 277
Nucleophilic and electrophilic character of Group 3 hydrides in organic reductions, 183
Nuffield chemistry apparatus, 41
Nuffield chemistry overseas, 26
Nuffield chemistry: two views—How not to teach chemistry, *and* In defence of Nuffield, 58
Nuffield film loops, 19
Nuffield, In defence of, 64
Nuffield 'O'-level chemistry examinations, 2
Nuffield—Schools Council courses for teachers, 39
Nuffield—the correct approach, 156
Nuffield trials at Canterbury, 125

'O'-level chemistry examinations, Nuffield, 2
Order and molecularity, 158, 321
Organic chemistry, The electronic approach to, 54
Organic electrochemistry, part 1, 299
Organic molecules, cheap, Activation of 289
Organic name reactions, part 2, 200
Organic photochemistry, 71
Organic reductions, Nucleophilic and electrophilic character of Group 3 hydrides in, 183
Origin of 'normality', The, 277

Periodic table, The *Aufbau* principle and the, 55
Ph.D. (Chemistry)—A Royal Society view, 163
Photochemistry, Organic, 71
Physical chemistry of ammonia manufacture and nitrogenous fertilizer production, The, 30
Physical quantities, The dimensions of, 81, 320
Polymer structures, 127
Privileged few?, The, 1
Project work in chemistry, 68
Properties of liquid ammonia, 78
Publication, Unilever, New, 314

Radioactive half-life experiment, A convenient, 178
Reactions, Reversible and irreversible, 109
Readers' Forum, 54, 104, 156, 214, 269, 317
Recent Books, 46, 96, 150, 210, 250, 304
Reductions, organic, Nucleophilic and electrophilic character of Group 3 hydrides in, 183
Reversible and irreversible reactions, 109

School chemistry, New examinations in, 112
Schools, Science equipment for—a Scottish approach, 286
Schoolteacher fellowship, Shell's, 173
Science equipment for schools—a Scottish approach, 286
Science places, Vacant, 142
Science students in sixth forms, 40
Second-order rate law, Significance of the parameter, λ, in, 214
Self-parody? (letter), 318
Serpentogenic properties of acetanilide, 104
Shell's schoolteacher fellowship, 173
Significance of the parameter, λ, in the second order rate law, 214
Silver mirror test, 269
Sixth forms, Science students in, 40
Sixty-nine years ago . . ., 317
Solid state, Defects in the, 160
Solution of chemical kinetic problems and simulation of kinetics of chemical interactions by analogue computer, 280
Spectrography, X-ray fluorescent, 295
Spectrophotometer for schools, 116
Spontaneous endothermic or thermoneutral reactions, 107, 162
Structural chemistry, Unit of, 10
Structures, Polymer, 127
Study guide, 215
Summer schools in chemical education, 134, 227
Symbolism and nomenclature, 318

Teachers, Information retrieval for, 233, 276
Teaching chemical documentation, 236
Teaching chemistry by machine, 141
Teaching history, 105
Technical journals, Learning from, 241
Tests, Multiple-choice, at university, 272
Training, Education and, of chemists for the 1970's, 87

Unilever, New publication, 314
Unit of structural chemistry, 10
Using models in chemistry, 135

Walden inversion, A molecular model to demonstrate, 139
Werner's coordination theory, Alfred, 11
World View, 43, 145, 229
Why chemical education?, 218

X-ray fluorescent spectrography, 295

Yeast fermentation, Zero order, 197

Zero order yeast fermentation, 197
